

IN THE CLAIMS

Kindly amend the claims in the present application in the following manner:

1. (Original claim) A container for consumable products, comprising:
 - front and back sheets of flexible material disposed atop one another, said sheets having four sides,
 - a first seal formed at three adjacent sides of said sheets to create a first compartment between said sheets,
 - engageable fasteners disposed parallel to the fourth side of each of said sheets, said fasteners facing one another and operatively cooperating to form a resealable closure at the fourth side of the first compartment,
 - said sealed sheets being folded such that the periphery of the side opposite the fourth side is disposed adjacent to and parallel with the periphery of said fourth side,
 - a second seal formed at the periphery of the folded sheets to form a second compartment, and
 - a third seal formed inwardly of the second seal and spaced outwardly of the first seal, said third seal being a perforated seal that enables detachment of a strip of material disposed between said periphery of said sheets and the third seal.
2. (Original claim) The container of claim 1, wherein said sheets are folded about an imaginary line located midway between the fourth side and the side opposite the fourth side.
3. (Original claim) The container of claim 1 wherein said fasteners are complementarily configured for engagement and disengagement, and said front and back sheets of flexible material comprise a plastic material.
4. (Original claim) The container of claim 3, wherein said fastener elements are configured as “zip-lock” fastener elements.

5. (Original claim) The container of claim 1 wherein said first seal is spaced inwardly from the periphery of said sheets.

6. (Original claim) The container of claim 5, wherein said complementary consumable goods are edible.

7. (Original claim) The container of claim 5, wherein said consumable goods are baby changing goods.

15. (Canceled)

16. (Original claim) A package for consumable products, comprising:
an enclosure having a top, a bottom and opposing side portions, the enclosure containing one or more items chosen from a first set of consumable products,
a first seal disposed about, and spaced inwardly from the periphery of, three adjacent side portions of the enclosure,

a resealable closure adjacent to the fourth side of the enclosure,
said enclosure being folded so that the periphery of the fourth side is disposed
adjacent to and parallel with the periphery of the side opposite to the fourth side,
a second seal formed at the periphery of the folded sheets to form a second
compartment of a size sufficient to house one or more items chosen from a second set of
consumable products, and
a third seal formed inwardly of the second seal and spaced outwardly of the first
seal, said third seal being a perforated seal that enables detachment of a strip of material
disposed between said periphery of said sheets and the third seal.

17. (Original claim) The package of claim 16, wherein said second compartment is
enclosed within said first compartment.

18. (Original claim) The package of claim 16, wherein said first and second sets of
consumable goods comprise edible items.

19. (Original claim) The package of claim 16, wherein said first and second sets of
consumable goods comprise diaper changing items.

20. (Original claim) The package of claim 16, wherein said first and second sets of
consumable goods comprise first aid items.
